PROFESSIONAL SUMMARY

Full Stack Developer holding a Professional Master's Degree in Computer Science (Mobile Application Development). Experienced in building and shipping cross-platform applications with React, React Native, Node.js, Express.js, MongoDB, and PostgreSQL, including a published fitness app and a full e-commerce platform. Focused on writing clean, scalable, well-tested code and quickly adapting to new technical stacks.

EDUCATION

Professional Master's Degree, Computer Science (Mobile Application Development)

06/2026

The Higher Institute of Technological Studies of Sidi Bouzid, Tunisia

- * Specialized in mobile application development, software engineering, databases, and cloud computing.
- * Completed academic and personal projects focused on designing and delivering cross-platform applications.

Bachelor's Degree, Web Development and Multimedia

The Higher Institute of Technological Studies of Sidi Bouzid - Tunisia

06/2024

- * Studied web development, database systems, JavaScript, HTML, CSS, networking, and multimedia technologies.
- * Built multiple responsive web applications as part of coursework.

PROFESSIONAL EXPERIENCE

Mobile Developer Intern (Parallel Internship)

02/2026 - 07/2026

DEFENDR - Tunisia

- * Built GymBro, a cross-platform fitness app in React Native, delivering 4 core modules (auth, workout plans, nutrition tracking, BMI/BMR calculators) used throughout a full development cycle.
- * Implemented user authentication and secure session handling, reducing unauthorized access risk by enforcing token-based login flows.
- * Integrated backend APIs and MongoDB to sync workout and nutrition data in real time across devices.
- * Improved app responsiveness by optimizing component rendering and API call structure, reducing perceived load times on key screens.

Web Developer Intern (Parallel Internship)

02/2026 - 07/2026

Unitech - Tunisia

- * Developed a responsive e-commerce website for PC components using Angular, Node.js, and PostgreSQL, covering the full product browsing and checkout flow.
- * Built and connected RESTful APIs for product management, enabling dynamic catalog updates without code changes.

- * Improved UI responsiveness and usability across mobile and desktop breakpoints, reducing layout issues reported during QA.
- * Collaborated with the development team on feature implementation, testing, and debugging within an Agile workflow.

Web Developer Intern

07/2023 - 08/2023

Unitech - Tunisia

- * Contributed to frontend and backend development tasks on live web applications alongside a small development team.
- * Assisted in debugging and testing, improving application stability ahead of releases.
- * Supported performance improvements that streamlined page load and interaction speed.

Computer Maintenance Intern

07/2022 - 08/2022

Tunisian Post - Tunisia

- * Performed routine hardware inspections and troubleshooting across office systems, ensuring equipment reliability.
- * Carried out basic system repairs and supported the maintenance team in minimizing operational downtime.

PERSONAL PROJECTS

GymBro | React Native, Node.js, Express.js, MongoDB | 08/2023 - Present

- * Designed and built a cross-platform fitness application from scratch, including authentication, workout plans, nutrition tracking, and BMI/BMR calculators.
- * Architected a Node.js/Express backend with a MongoDB data layer, exposing RESTful APIs consumed by the React Native client.
- * Implemented JWT-based authentication to secure user accounts and protect API endpoints.
- * Optimized data-fetching and state management, improving app responsiveness on lower-end devices.

Ember Menu Studio | Next.js, React, TypeScript, Supabase, Tailwind CSS

- * Built a full-stack Next.js platform that lets restaurants create, customize, and publish digital menus without custom development.
- * Designed a Supabase Postgres schema (profiles, menus, categories, menu_items, menu_views) and used Supabase Auth (Google/Apple OAuth) and Supabase Storage for image/logo uploads.
- * Developed a public menu reader with multiple visual templates, theme/color customization, and QR code generation for table-side sharing.
- * Implemented a view-tracking route handler that records daily menu impressions, and added PDF export of menus using React PDF and jsPDF.

Souk Outlet | Next.js

- * Built a mobile-focused Next.js application for a clothing retailer based in Saudi Arabia.
- * Developed the storefront experience for browsing and presenting the shop's product catalog.

Desktop Pet | Unity (C#), Windows API

- * Built an interactive desktop companion app in Unity that reacts in real time to system-wide keyboard and mouse input.
- * Used the Windows API to detect global input events (typing, left/right/middle clicks) outside the app's own window.
- * Implemented drag-to-move, scroll-to-resize, and a borderless always-on-top window for a native desktop-widget feel.
- * Built a simple state-driven animation system (Idle, Typing, Click poses) to reflect user activity.

HACKATHON

Hackathon Participant, OpenGovDataHack 2023

Built a healthcare application with a team of 3 developers in 72 hours using Flutter, focused on early detection support for diabetes and breast cancer.

SKILLS

Frontend: React, React Native, Angular, Expo, HTML5, CSS3, Responsive Design, TypeScript, JavaScript

Backend: Node.js, Express.js, REST APIs, API Integration, CRUD Operations

Databases: MongoDB, PostgreSQL, MySQL

Tools: Git, GitHub, Postman, VS Code

Methodologies: Agile Scrum

LANGUAGES

• Arabic — Native | English — Advanced | French — Intermediate
